

AQUASAFE OF CAPE COD

PURIFIER 2 WATER FILTRATION SYSTEM

The Purifier 2 water treatment system provides comprehensive filtration plus microbiological interception that is not available in any other filtration product. The Pure Water Purifier 2 is NSF Tested and Certified and is the only filtration system that has been tested and California DHS Certified to protect against disease causing microorganisms. This includes items such as E-Coli, Salmonella, Cholera, Legionella, Cryptosporidium and much more.

FEATURES

- **Stage 1:** Sediment Filter removes particulates down to 5 micron.
- **Stage 2:** Purifier /Carbon Block Filter removes chlorine taste and odors, and removes;
Bacteria..... 99.9999 %
Virus 99.9900 %
Cysts 99.9500 %
- Patented state of the art microbiological interceptor
- California Department of Health Services certified for purifier claims
- Solid Brass high flow "Designer Faucet" featuring the new top-mount installation.
- Ideal for homes, RV's and boats

VERSATILITY

- Space saving design installs under sink or in limited space areas.
- Adapt-A-Valve easily connects to water source.

RELIABILITY

- Advanced design uses patented technology and high quality components to assure years of continuous operation with trouble free performance.
- The Purifier 2 is backed by the manufacturer's 130 year reputation for excellence.

PERFORMANCE

- NSF tested and Certified to Standard 42.
- The Purifier 2 System water quality output far exceeds the purity of other filtration and faucet mount devices.

PURIFIER 2

System has been tested as a Microbiological Water Purifier based upon the recommendations set forth in the USEPA Guide Standard and Protocol for Microbiological Water Purifiers (OPP Task Force Report, 1987)

System tested and certified by NSF International against NSF/ANSI Standard 42. Refer to PDS for specific performance claims.

AQUASAFE OF CAPE COD

Sales, installation and maintenance of water purification systems

and more....	✓

OPERATING PARAMETERS

Temperature	Minimum 40°F (4.4°C)	Maximum 100°F (37.8°C)
Pressure	Minimum 20 psi (1.40 kg/cm2)	Maximum 85 psi (5.97 kg/cm2)
pH	Minimum 2	Maximum 11
Rated Capacity		2000 Gallons (7570 liters)

SYSTEM MAINTENANCE

Stage	Filter	Frequency
1	5-Micron Sediment	6-12 Months
2	5-Micron Purifier Carbon Block	6-12 Months
