

AQUASAFE

OF CAPE COD

WHOLE HOUSE WATER FILTER LIGHT COMMERCIAL OR INDUSTRIAL FILTERS

Whole house, light commercial/industrial filters are installed right at the entrance to your house or at the point of entry. These filters are intended to treat all water conditions and come in various flow rates and micron sizes. The Whole House Water Filter has 3/4" mpt reinforced brass inserts. This unique item comes with a standard, patented valve-in-head system with a 50 micron depth sediment filter and wrench.

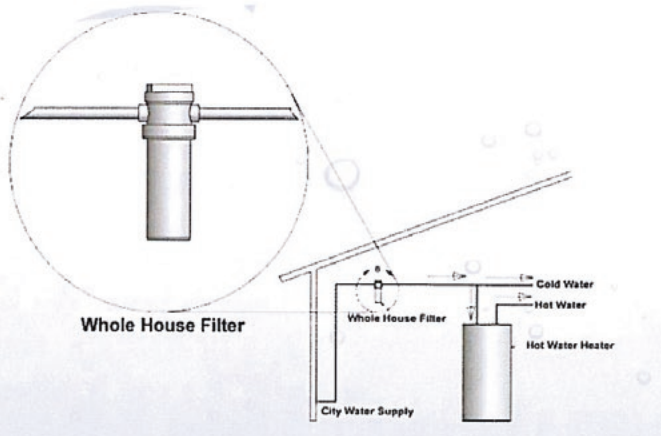

**WHOLE HOUSE
WATER FILTER**

FEATURES

- Treats all water at point of entry
- Reduces sediment and other particulate matter
- Protects and extends the life of Reverse Osmosis units, softeners, water heaters, fixtures and appliances
- Compact 5" diameter x 14" high
- Clear housing makes it easy to see when your filter needs to be replaced
- Valve-in-head feature allows you to change, shut off, or by-pass your unit with one quick and easy turn of the head

REPLACEMENT FILTERS

Filter	GPM Flow Rate	@ .6 PSI Drop
50-Micron Spun Depth	10	.4
20-Micron Spun Depth	8	.5
